During 1993 the remains of a well preserved boat displaying many characteristics typical of Romano-Celtic boats was excavated at Barland's Farm in the Gwent levels on the northern shore of the Severn estuary. This volume reports on the results of the excavation and survey which also revealed a stone and timber structure associated with the boat and a palaeochannel. Specialist sections examine the environmental data gathered from the site and boat and report on the finds which included Roman pottery footwear and animal bone. Each section of the boat itself is described and discussed in detail before conclusions are drawn about the construction of the boat in the 4th century and what it reveals about boatbuilding in Roman Britain as well as sea levels and seafaring in the Bristol Channel and Severn estuary during the Roman period. Includes a glossary and catalogue of timbers. Welsh summary.

This edition brings together all the archaeological knowledge of the world's boats and ships for the benefit of the maritime archaeologist as well as for the general reader and enthusiast, the historian and the student. But it is much more than a catalogue of the world's boat finds. The author has collated all the available evidence on the evolution of boat and shipbuilding through the ages and examines it as a crucial part of the development of changing civilizations.

belongs in the bookshelf of every cruising vessel. Blue Water Sailing: if you are serious about that extended voyage, read the Voyager's Handbook. Sailing every now and then, a new voice emerges in the world of sailing literature that stands out as a voice that is both clear and of lasting quality. The appearance of such a new voice is something of an event, and that's what we'd call the publication of the Voyager's Handbook. Blue Water Sailing: this inspirational and comprehensive manual leads you step by step through every aspect of choosing, planning and following the Voyager's life, using three example boats representing three cruising lifestyles: simplicity, moderation and high life. Beth Leonard helps make your

bluewater dreams come true whether you're sailing on a shoestring or a CEO's pension starting with the things you can't do without: an enthusiastic crew, a seaworthy boat, and of course money. Leonard offers sage advice on how to select crewmembers who are truly committed to the voyage, how to choose the right boat for you, and how to find just the right approach to financing your voyage and making the most of every dollar spent managing life from a floating home. And keeping that home livable, seaworthy, and safe requires you to become, among other things, the ship's purser, engineer, doctor, cook, and cruise director. You'll discover how to prepare for these new roles and put necessary equipment and arrangements in place before you untie your docklines. This exquisitely detailed guide also helps you master the skills you'll need to handle a boat at sea with a small crew, including weather forecasting, passage planning, watchkeeping, heavy weather sailing, emergency management, mid-ocean repairs. Complete with dozens of easy-to-use graphs and tables for quick reference, along with the hard-won wisdom of experienced cruisers, *The Voyager's Handbook* is the ultimate resource for anyone who is planning, preparing for, or just dreaming about a great adventure on the high seas.
